

Tool ideas for jewellers and watchmakers

Time-savings are the focal point of innovation

Acquiring new tools is one motivation for watchmakers and jewellers attending BASELWORLD. Bergeon has brought a range of new products to the show this year. The company is exhibiting a set of screwdrivers in anodised aluminium with an elastomer coating. The blade is made from hardened stainless steel. Also new to the programme is a watch case device with a new synthetic base

and vice specially created for big cases with a diameter of up to 60 mm as well as an extractor for rotating bezels up to a diameter of 50 mm.

New watchmaker tools
are presented by Bergeon

Bergeon has developed a broad variety of new tools for watchmakers
